

Company Profile

1983 - 2023 Our first 40 years of entrepreneurial experience have arrived. Those were sparkling, dynamic, technological and international years.

In 1983, my father Walter after 16 years of collaboration in another company, set up on his own and set up the first production site; I thought it best to put myself to the test right away even though I was still a boy and still studying, giving me the opportunity to design and make the first wooden tables line.

This is how we became partners of the most important companies in the Chair Triangle District and the Livenza Furniture District. Among the most famous brands, I remember with pleasure the collaborations with important companies and designers such as for example CALLIGARIS, POTOCCO, MONTINA International, MARONESE GROUP, SANTAROSSA; furthermore being able to share secrets and production techniques with characters of the caliber of Enzo Berti, Jasper Morrison, Patricia Urquiola, still world leaders in Design, we produced tables for third parties and the success we have achieved we owe it to all the customers who, numerous, in the years have believed in our ability, seriousness, quality, constancy.

1998 - 2023 was the year in which ITF Design srl was born, the company of the group that offers its collections under our signature all over the world and which allowed us to grow significantly and to be known worldwide.

We have sold and are still selling in various foreign countries and our collections are present in the best furniture stores in Japan, Korea, USA, Israel, Cyprus, England, France, Germany, Austria, Holland, Belgium, Poland, Czech Republic, Hungary, Greece, Spain, Portugal, Finland, Slovenia, Croatia, Russia, Emirates, Qatar, Bahrain.

We have reached incredible numbers, and we can proudly say that we have seated millions of people around the world, producing tables & chairs for decades.

To all customers who buy and use ITFDESIGN branded products we simply say THANK YOU, it was a pleasure to serve you !!!

Alberto Turolo – Designer, Art Director and Head Sales Manager ITF Design srl

Our History – A family passion

Since 1983, we have combined contemporary design and traditional craftsmanship to produce tables and chairs that spread our history all over the world.

ITFDESIGN is a family business that speaks of a world that is at once informal, elegant and contemporary.

The continuous search for the creative potential given by exclusive combinations of industrial materials, natural materials and craft techniques, combined with the passion of over 40 years of activity, has given life to a style that is recognisable all over the world.

Ceramic experts

From 2007 we are manufacturer of tables, coffee tables, accessories and complements with surfaces in Porcelain Stoneware, Marbles & Stones effects, from the best Italian Ceramic Slabs Industries.

Astyle

Today the company it's specialized and become the most innovative producer of tables, coffee tables, sideboards and complementary items in ceramic stones and marbles in Italy and Europe. The experience made in this 16 years give us the necessary know how, to create a real revolution in the market. Today the company is a reality of success on the international market, export the 95% of the turnover and is active in both the contract and residential sector with proposals perfect for any environment:
homes, offices, places of study or work, indoors and outdoors.

NYHAVN Chair + Radius

The company carefully considers the stimulus coming from the design and art world as well as from the evolution of living, in order to create contemporary solutions which can meet all present-day needs. The result is a collection of products having an essential style but with a strong identity, which fits without merging, and becomes part of all environments: at home, in studying or working areas, indoor or outdoor. A further evidence of the high value and of the superior quality of ITF DESIGN creations, are the successes obtained in prestigious awards.

BRAVE – a storage solution

A principle of production where tradition, strictness and quality research are well integrated to the constant testing of new materials and technologies, achieved with the support of major Universities and chemical industries. This philosophy brought the company to patent a great number of models as well as several production processes.

MAMAMIA Chair

ITF DESIGN products undergo hi-tech processes and are manufactured using the most traditional and advanced materials: solid wood, porcelain stoneware, steel and aluminium alloys, polymeric materials like polycarbonate, polypropylene, nylon.

All models are checked through strict tests in order to guarantee conformity with the most important quality and safety standards

Moulded in transparent polycarbonate with gas technology of the second generation, it is antistatic, scratch and UV resistant and conforms the UNI EN 15373 standards

*When you buy ITF Design products
you don't get just simple mass-produced items.
You're buying hundreds of working hours spent in design,
failures, tests and experiments.
Days, weeks and even months plenty of frustration
and satisfaction.
You're buying furniture,
but you're actually obtaining a piece of heart.
A piece of our soul, some life-time of our artisans.
Our work is our passion and your daily pleasure.*
