

X_Light Metal

tavolo/table

design: Alberto Turolo

Misure / Size

Tavolo da pranzo realizzato in acciaio al carbonio riciclato proveniente dall'industria automobilistica per mantenere una finitura di alta qualità in qualsiasi stagione.

Il design presenta gambe autolivellanti per una funzionalità ottimale, bilanciando perfettamente il terreno irregolare. La scelta di utilizzare l'acciaio sia per il ripiano che per le gambe, rendono il prodotto a fine ciclo, riciclabile al 100%.

Materiali e tecnologie: Ripiano in lamiera d'acciaio e gambe in tubo d'acciaio 35x35 mm trattato in cataforesi (per outdoor) con tirante strutturale interno in acciaio.

Finiture: Verniciato bianco, verde, grigio seta, grigio pietra o nero per outdoor, ma per progetti contract è possibile personalizzare il colore seguendo le scale RAL o PANTONE.

Crafted in Italy, this dining table is made from recycled carbon steel sourced from the automotive industry, qualities to maintain a high-quality finish whatever the season.

The design also features self-levelling legs for optimum functionality, seamlessly balancing out uneven ground.

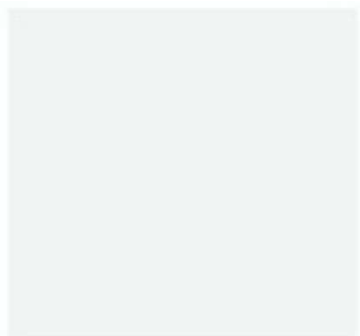

The choice of using steel for both the shelf and the legs make the product 100% recyclable at the end of the cycle.

Materials and technologies: Structure in steel sheet and legs in steel tube 35x35 mm treated in cataphoresis (for outdoor) with internal structural steel tie.

Finishes: Painted in white, green, silk gray, stone gray or black for outdoor use.

On request we can customize the color following the RAL or PANTONE scales.

Finiture / Finishes

White Coconut

Bronze Green

Black Licorice

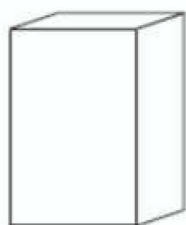

Silk Grey

Dark Grey
