

Hi there! I am FOLD the new dynamic Stool.

Design Alberto Turolo

MADE IN ITALY - PATENTED

We live in small and smaller spaces, where the space for our furniture is rather tight.

From this consideration began the study of FOLD, a sturdy and iconic stool, with the advantage of being foldable and resealable in a very small space.

Designed for both residential and contract use, it is a dynamic and intelligent product.

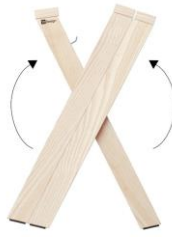

Its solid ash wood structure from responsible sources, is patented, tested and certified.

The automated steel closure allows opening in a single "Clack" and once opened for use, it can also be stacked horizontally.

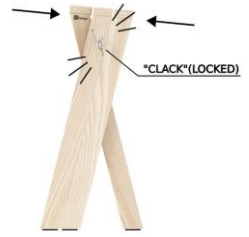

A fantastic solution for those who have to collect the chairs, and store them safely at the end of the day activity.

Stackable in vertical

Foldable

Fast Opening

Compact dimensions

98% Ash Wood Recyclable

Stackable in horizontal 10 pcs in 2 meters
